3. SMS notification on new tweets and Buzz.
4. Theme Support with save as default theme option.

TO Dos

1. Full Functional Buzz Integration once API is released.
2. Conversion to a central application for Buzz, Twitter and Facebook.
3. Tweet, ReTweet and Direct Reply my just message.
4. Tweet By voice using Ribbit platform.

Innovation

1. First Desktop Client For BUZZ.
2. Automatic URL Shortening.
3. SMS Notification Using Ribbit Platform.
4. System Taskbar integration.

5. System Notification Integration.
6. Automatic Apache Tomcat Starting on enabling SMS notification.
7. Chromeless.
8. Used MVC Pattern.
9. Theme Support with save as default theme option.
10. Observer Pattern(Using events).
11. Automatic Background fetching from Twitter configuration.
12. Automatic Mass Storage Device Detection and tweet data transfer into the device.

Air 2.0 features used

1. Automatic Mass Storage Detection.
2. Native Process API calling.
3. Open Document API.
4. 3 D rotation.
5. Used Content Background color.

Configuration

1. Install Sociogoulash.air file using AIR 2.0 Beta 2.

2.SMS Notification Configuration

When SMS notification is enabled you have to give path of Tomcat server(LocalHost) on which your SMS sending web Service will be running.

a. Tomcat Configuration

Install Tomcat and if you are behind the proxy add following line in catalina.conf file :

`https.proxyHost=<proxyHost>`

`https.proxyPort=<proxyPort>`

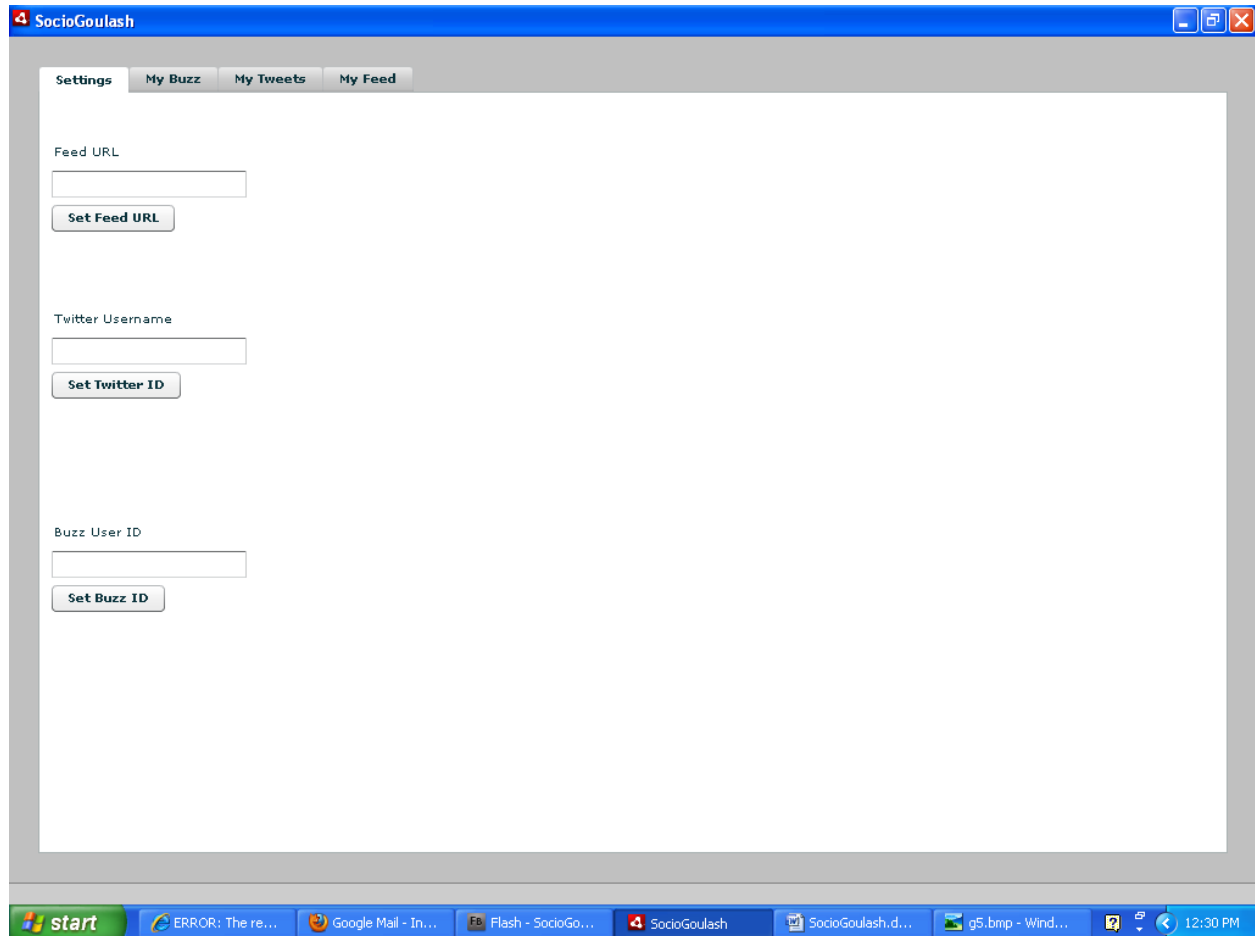

b. Notification Web Service Configuration

Unzip SMSWebService.zip in WebApps folder of tomcat. For testing purpose I have used configuration file with my account details to change them(If You Want) perform following changes

- Add Ribbit Application Configuration to ribbit.config file in SMSWebService/Web-INF/classes/.
- Change Your username and password in sendSMS.jsp file as parameter of login() function.

How to Use SocioGoulash

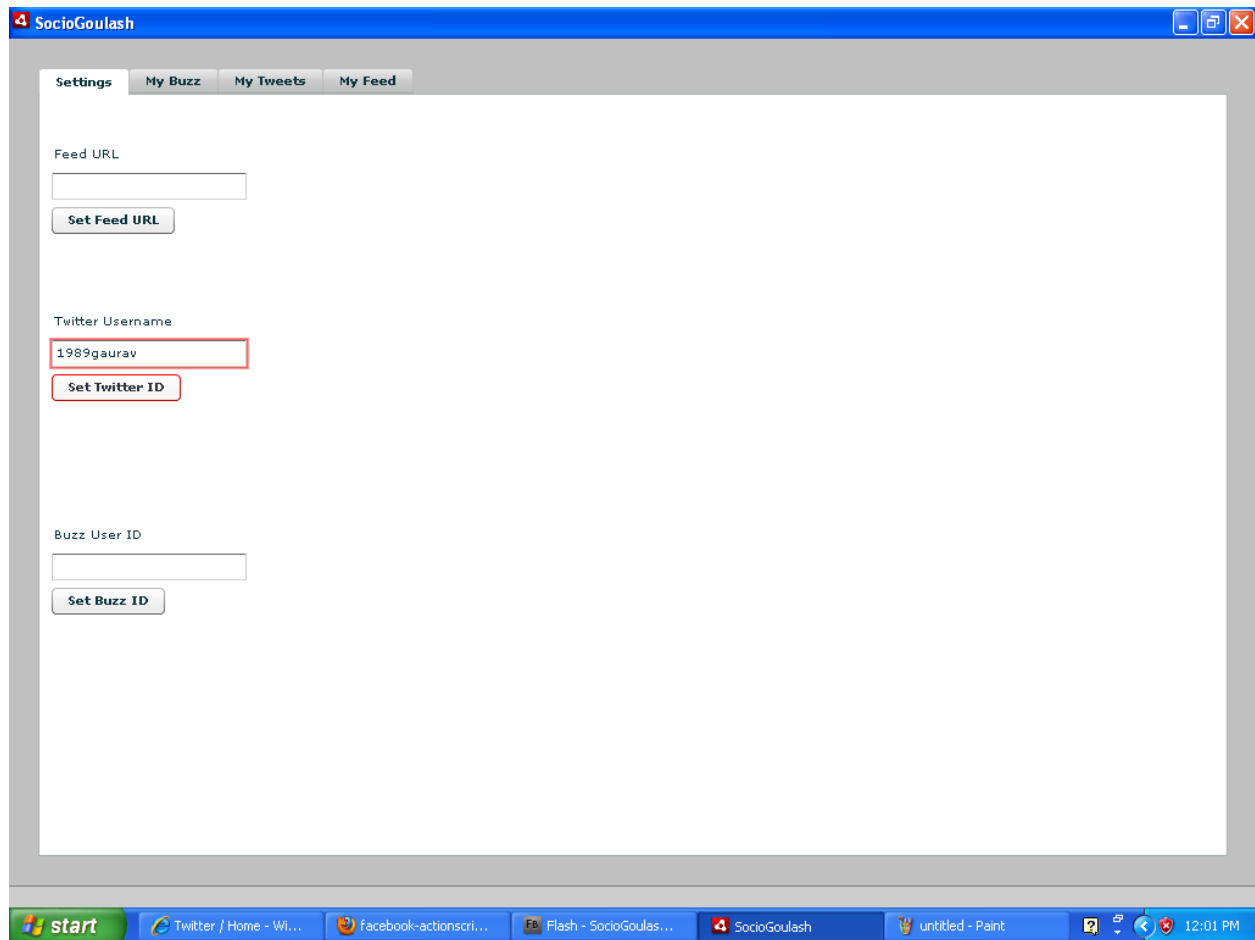

We have 4 Tabs Settings, My Buzz, My Tweets, My Feed.

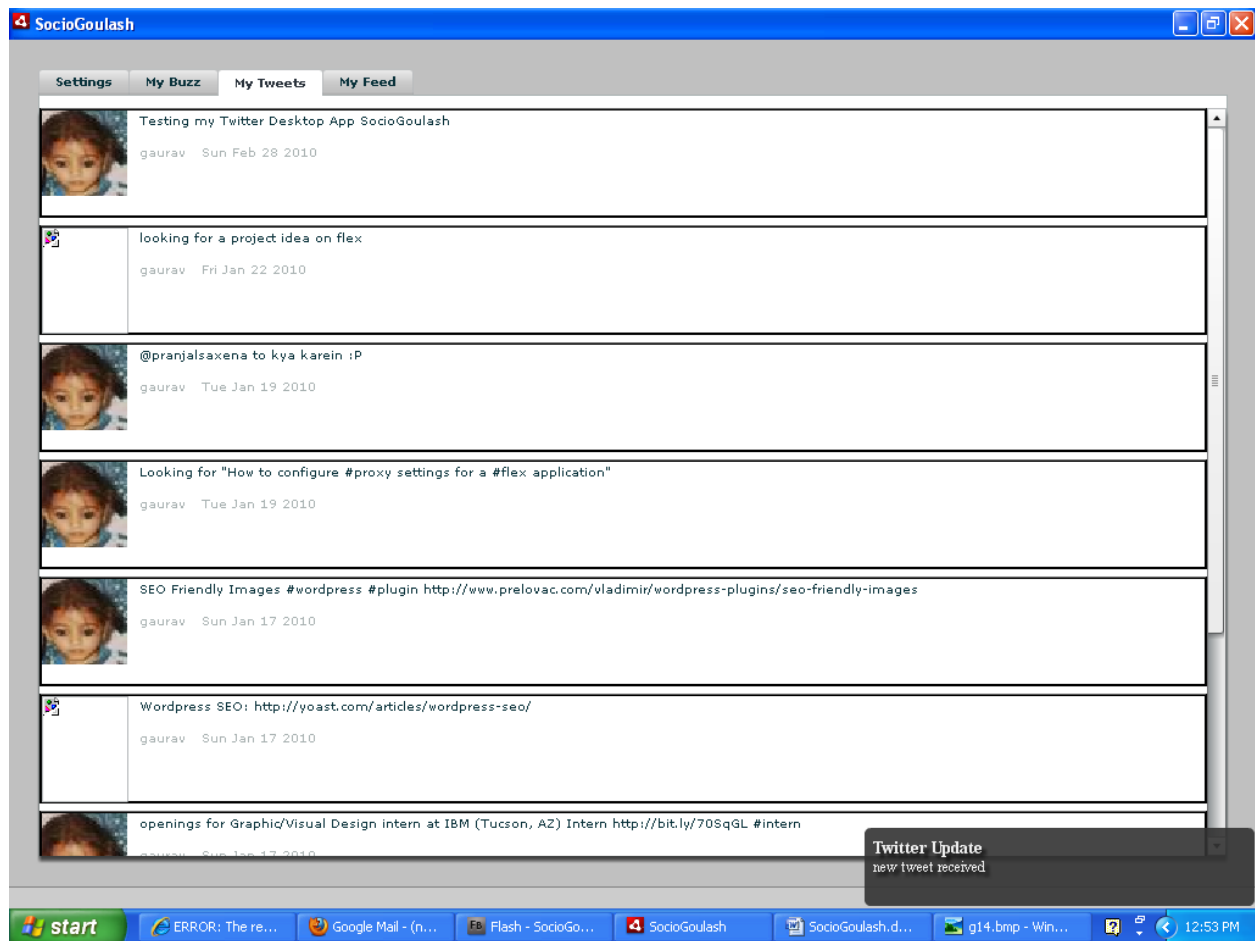

We have some default initial Ids and URLs for Buzz, Twitter and Feeds which can be changed using Settings Tab. Lets Start with Twitter First

Twitter

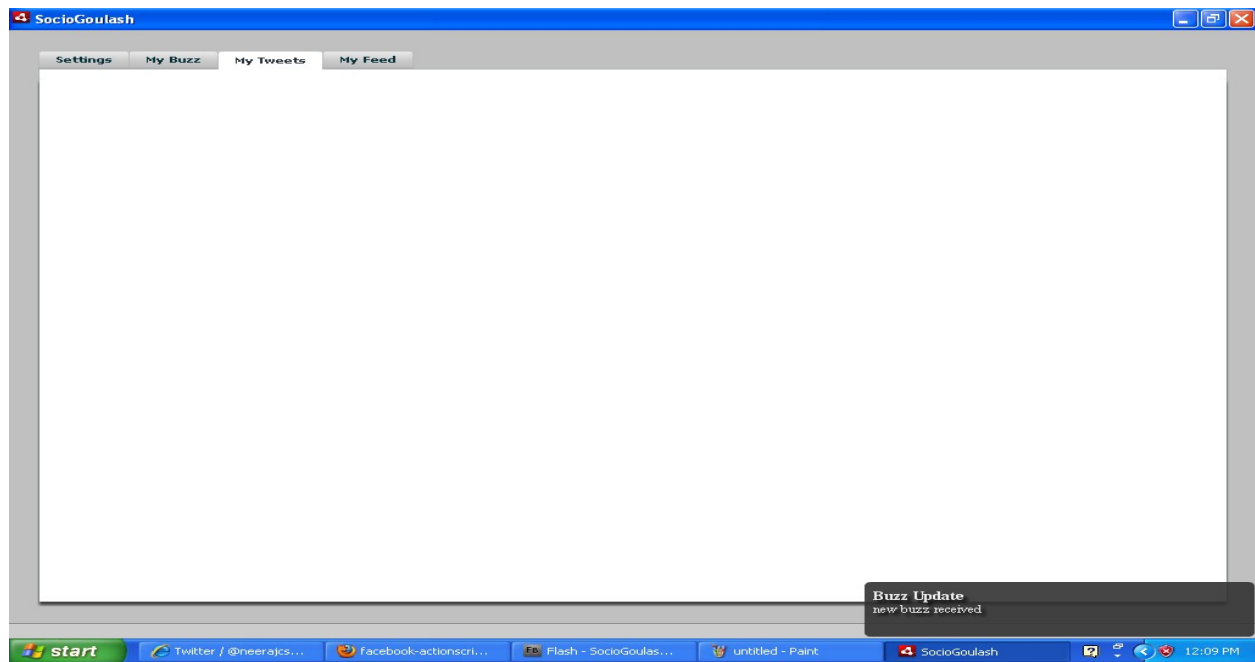

Write twitter username in second text field and click Set Twitter Id button. Now it will be your twitterId untill you change it again.

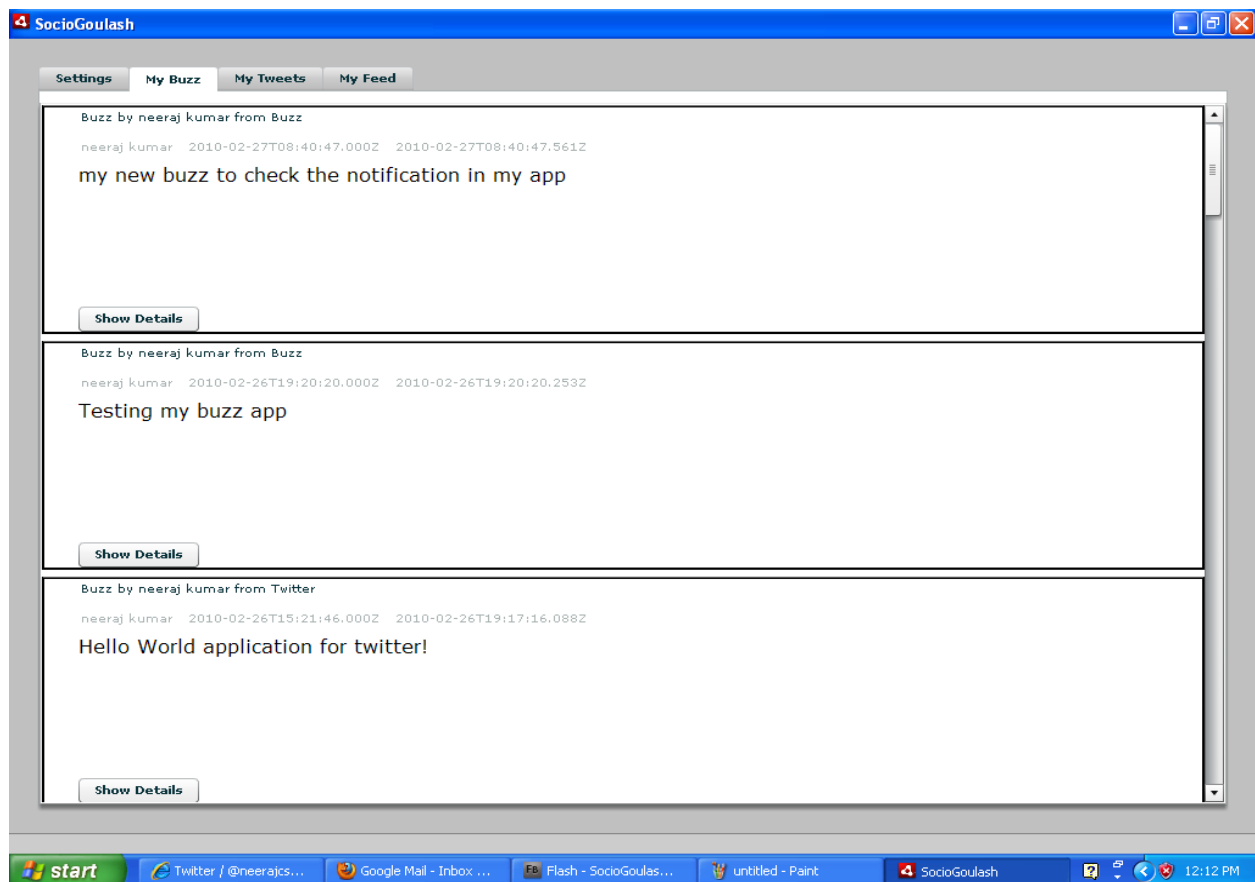

Click on the My Twitter Tab to see all the tweets :

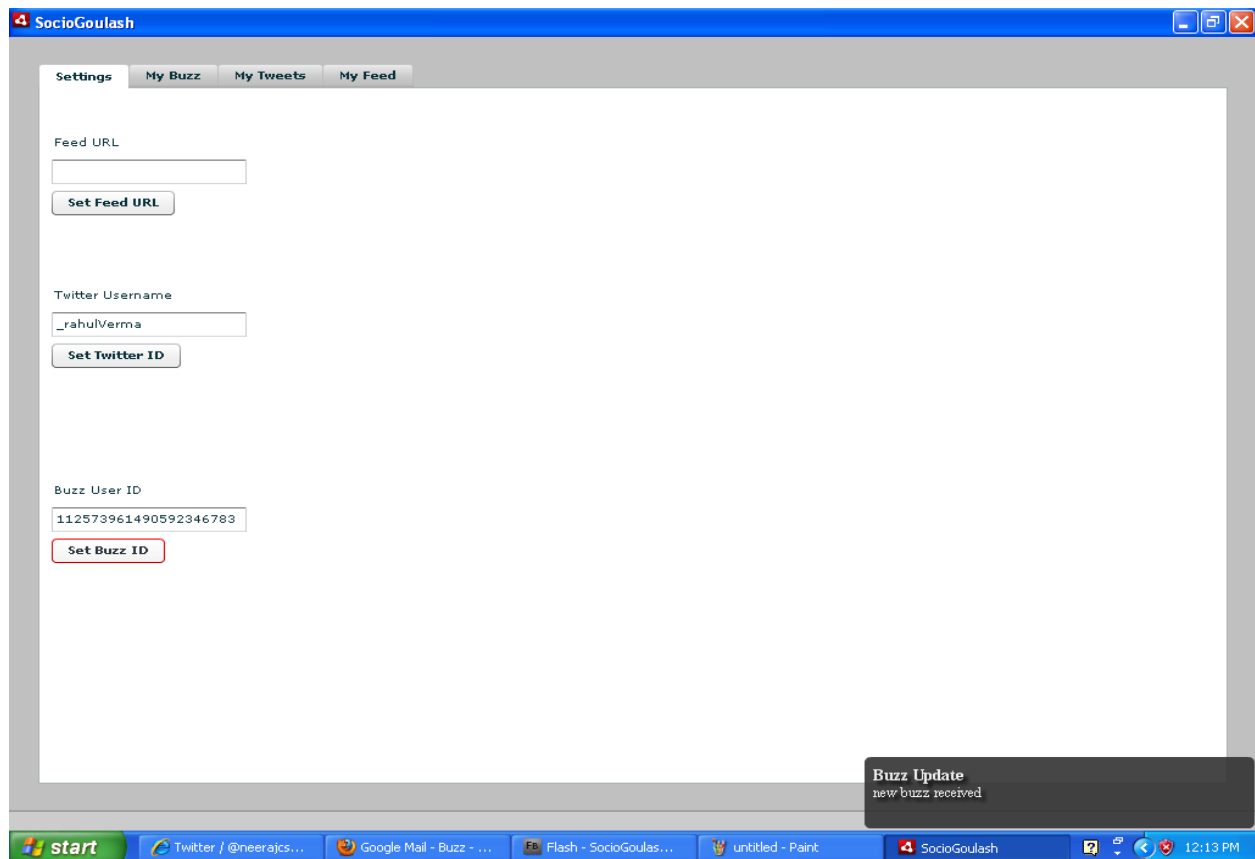

You will get all notification about any updates on Buzz, Twitter and Feed at bottom right corner as shown in this snap shot:

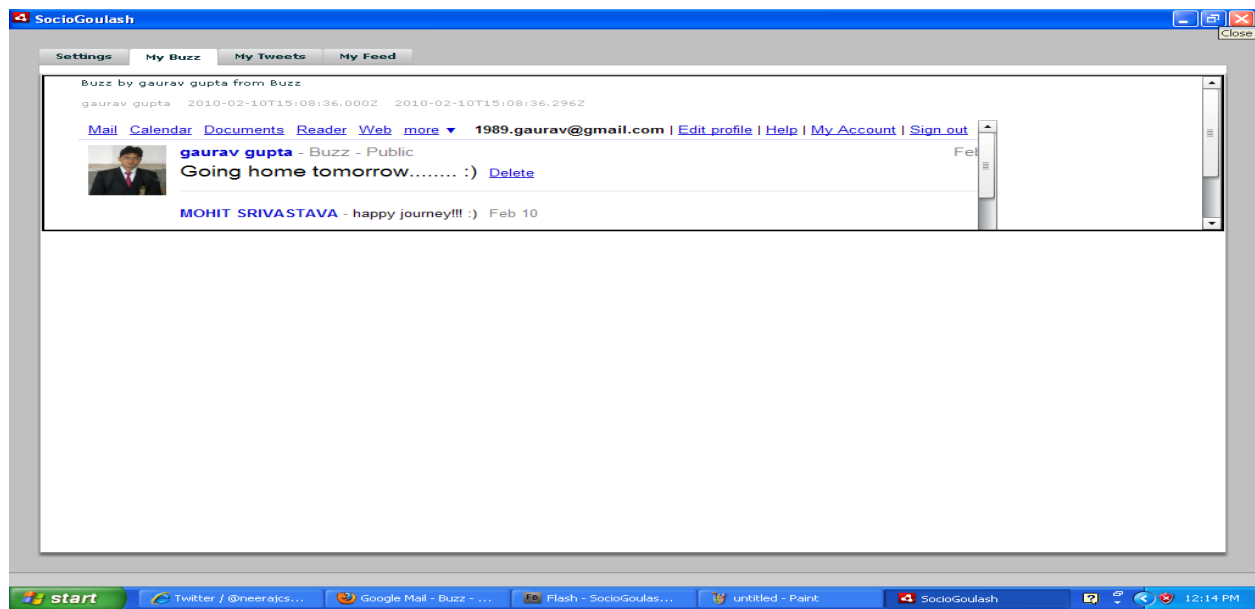

Buzz update received, so Lets check the My Buzz tab

This was Buzz for default set Id, lets move to settings tab and change it

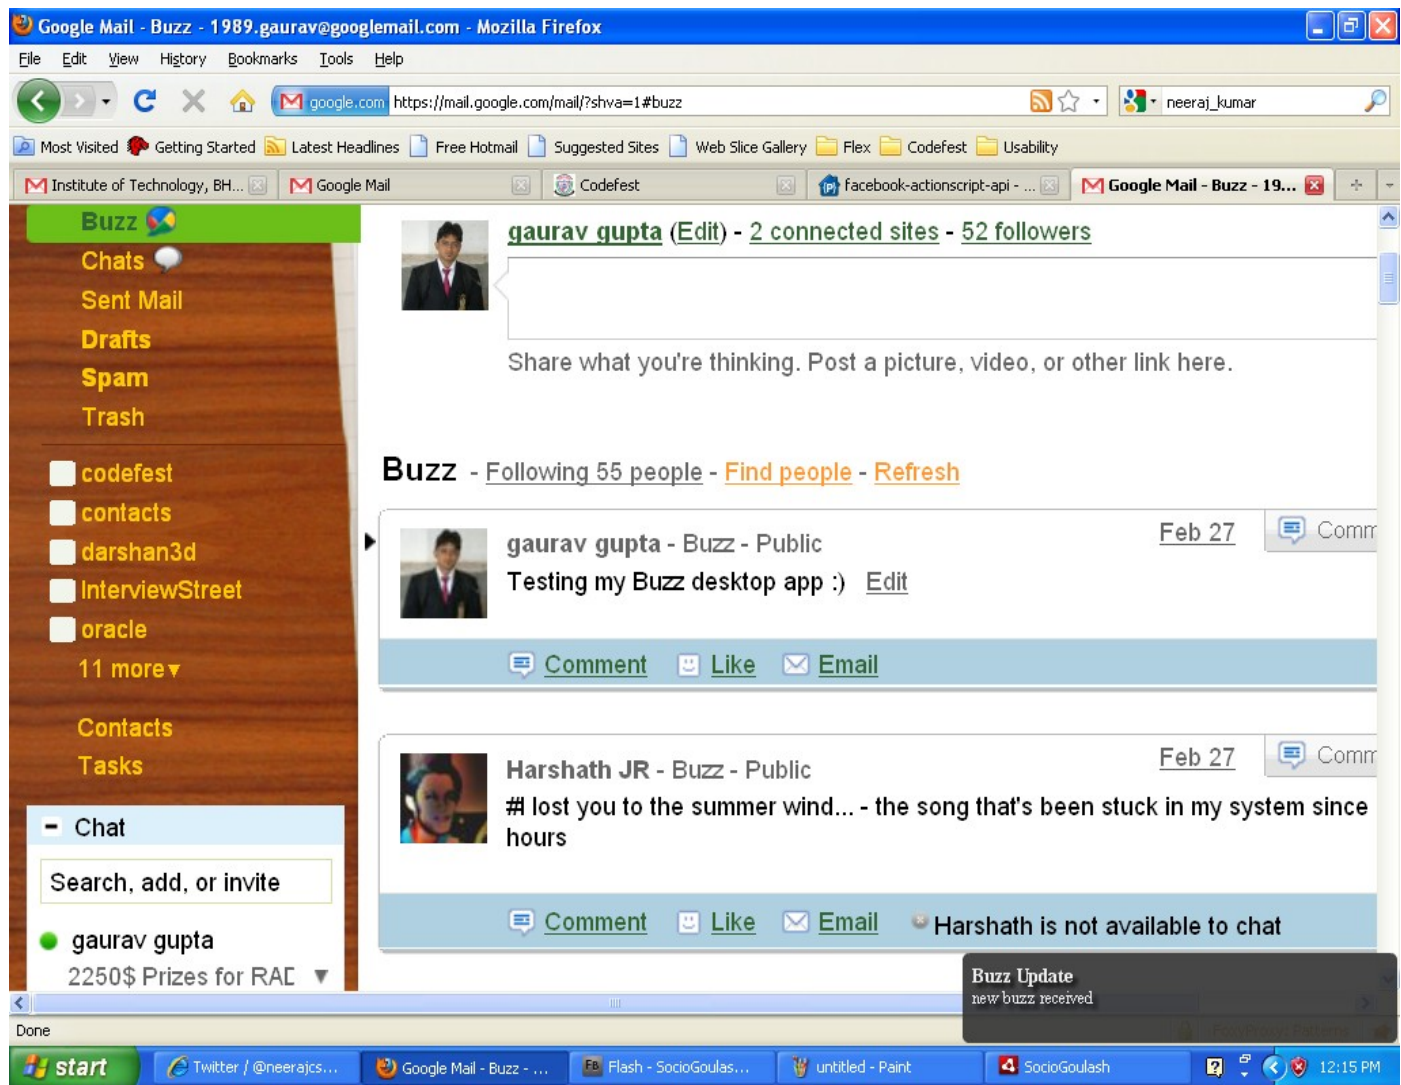

Now Move to My Buzz tab to see Buzz of gaurav gupta (112573961490592346783).

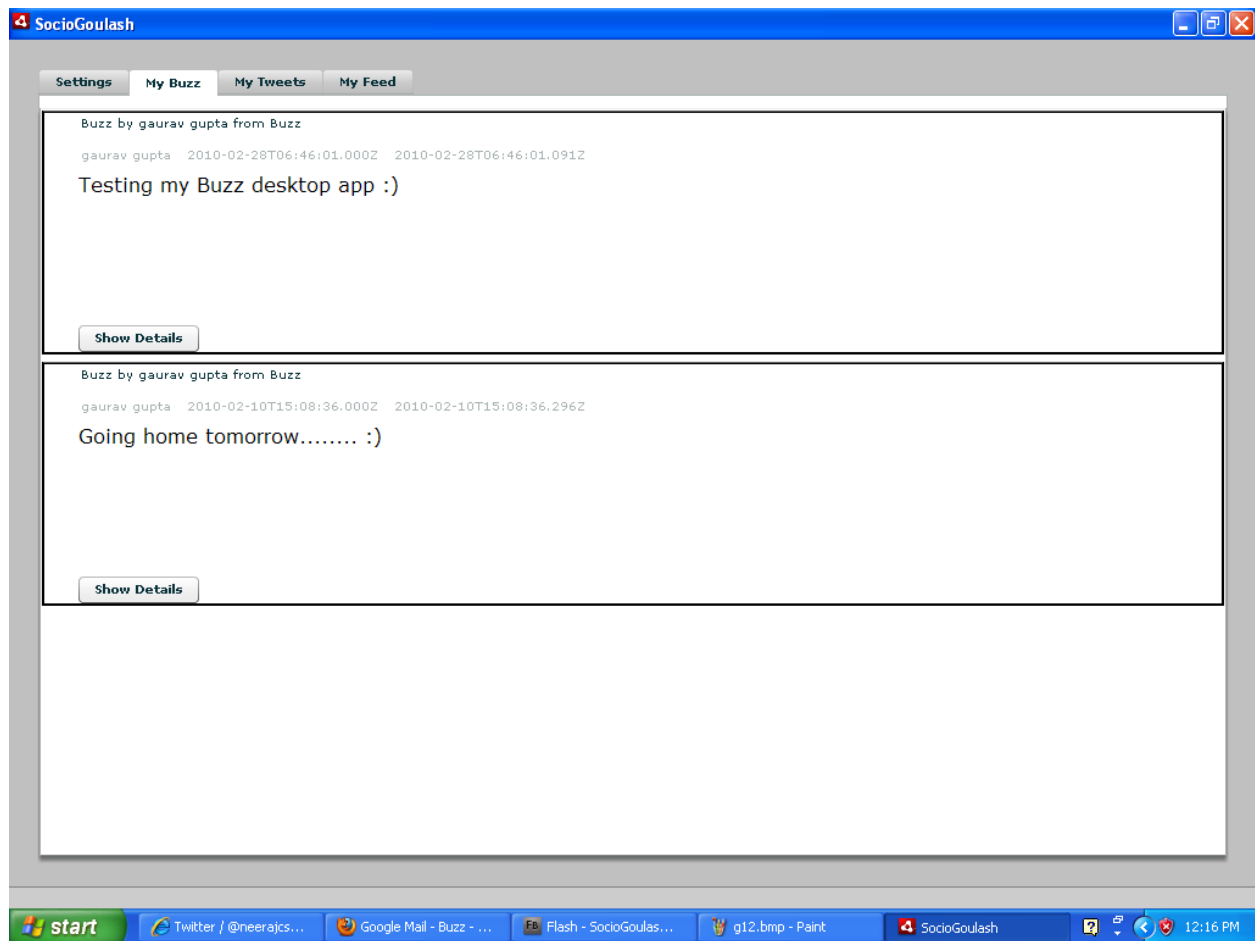

You can click on more details buttons for all comments received on you buzz.

Now to check If its getting new updates or not, Lets Start a new Buzz

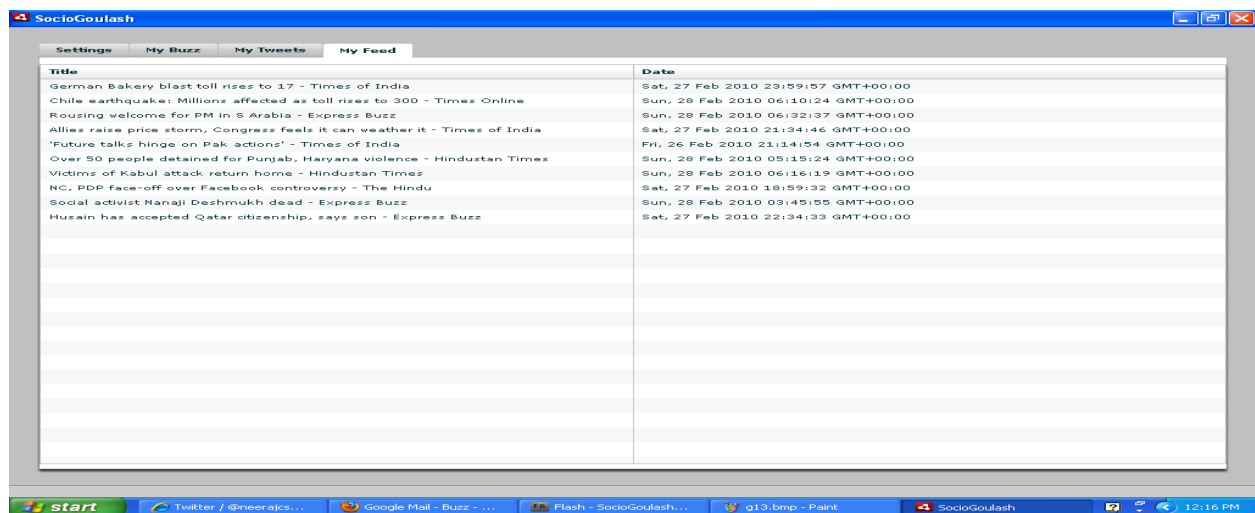

When SocioGoulash is minimized, then also it shows the notification that you have received a new buzz. Go to My Buzz tab in SocioGoulash to check new Buzz

Feeds

Similary you can change Feed URL from settings tab. My Feeds tab look like

To get more details double click on respective news

The screenshot displays the SocioGoulash application window. The interface includes a sidebar on the left with a 'Title' section listing various news items. The main content area features a large article titled 'Chile earthquake: Millions affected as toll rises to 300' with a sub-headline 'Rescue teams have begun to search for survivors after one of the largest earthquakes on record killed at least 300 people in Chile and sent giant waves roaring across the Pacific Ocean'. The article text continues with 'In an address to the nation, President Michelle Bachelet said two ...' and includes several hyperlinks to related news articles from Reuters, CNN, The Associated Press, and ABC Online. A taskbar at the bottom shows the Windows start button and several open applications: Twitter, Google Mail, Flash, g14.bmp, and SocioGoulash. A system tray notification in the bottom right corner indicates 'RSS Update' and 'new RSS received'.
